

MERLIN INFLATABLES

GIANT AND ROOF TOP INFLATABLES

Primary applications and uses

Where it is not possible to use a 'fly in the sky' aerial advertisement, the next best form of advertising is a Giant Roof topper, or Giant ground standing inflatable. Whether in the form of a product replica, a special shape, or a message digitally printed on to an inflatable signboard, high visible public awareness is assured. Roof topper Inflatables have been manufactured as seasonal promotions such as Father Christmas or as Easter Eggs or simply as a Hot Air Balloon shape carrying a simple message. Ground standing, your Giant Inflatable cannot fail to be an attention grabber, towering above your target audience conveying your message or product/service to them in a unique and memorable manner.

Product Description

The size and intricacy of shape will dictate as to whether the Inflatables are constructed using reinforced coated PVC or a coated nylon fabric. The Inflatables require a continuous fan blower to keep them inflated and are time as shown them to be durable and easy to use products. Most Giant Inflatables can pack into a large sports bag and dependant on the size and type of fabric used can weigh from approximately 16kg to over 100kg.

Sizes.

Roof toppers and Giant Inflatables have the most impact when they are manufactured from a height of 15ft to 25ft although they can be manufactured as little as 6ft high.

The larger Inflatables are generally supplied with a 240v Fan Blower, which measures approximately 60 x 40cms and weighs approximately 16kg.
