

# MERLIN INFLATABLES

## SKY GUYS

### Applications and Primary Uses

Sky Guys are proving themselves to be one of the most versatile and popular inflatable products to be introduced to the market over the last 5 years. The Sky Guys create a highly attractive and dynamic aerial display its waving arms and dancing body drawing attention to any sales activities close by.

These mesmerising aerial displays provide an amusing magnet at countless events wherever a unique marketing opportunity is required.

If it is an outdoor event the Sky Guy can be used as part of the activities or to draw attention to a particular focal point.

If used for indoor events the Sky Guys can be art worked with a promotional message or to draw attention to the event entrance or simply as an entertaining dynamic attraction

### Product Description

Stitching together a number of shapes using a coated ripstop nylon fabric creates the 'envelope' that is the Sky Guy. The legs of the Sky Guy are then simply connected to two 240v axial fan blowers. The fan motors are encased in a rigid high impact glass reinforced, non-corrosive polypropylene housing. This casing has a dual purpose in not only offering protection to the fan but strong mesh also acts as safety feature to protect users of the fans.

### Sizes.

The popular Sky Guy with two legs for two fans is available 25ft tall. Single Fan Tubes range from 12ft upwards. Special Sky Guys can be made to order.
